

Your Fly Logic Warranty

Your Fly Logic rod includes a lifetime warranty free from defects in materials or workmanship to the original owner only. We carefully inspect all rods prior to shipment; however, should you detect any defect in either material or workmanship, please return your rod to an Authorized Fly Logic Dealer or by prepaid postage to: Fly Logic, Inc., 511 Broadway Avenue, P.O. Box 270, Melba, Idaho 83641-0270 (Phone: 208-495-2090, E-mail: fli@flylogic.com). Fly Logic will repair or replace the defective part(s) and return the rod to the original owner for a \$75 processing, handling, and shipping fee.

Your Fly Logic rod should be periodically cleaned as described in this manual. Properly cared for, your rod will provide you with many years of great memories. Welcome to the Fly Logic family.

To implement the warranty, please complete the registration card provided with your rod and return to Fly Logic within thirty (30) days from date of purchase.

This warranty does not extend to any Fly Logic product that has been damaged or rendered defective as a result of (1) unreasonable use or neglect, (2) the use of parts not supplied by Fly Logic, or (3) modification of the product. Nor does the warranty cover normal wear and tear caused by use of the product over time. (01/06)

THE ABOVE-DESCRIBED WARRANTY IS GIVEN IN LIEU OF ALL OTHER WARRANTIES EITHER EXPRESSED OR IMPLIED.

This warranty is limited as set forth above and does not cover any consequential, special or incidental damages. These limitations and exclusions may not apply to you, depending upon specific legal rights, which may vary from state to state.

Fly Logic Series Fly Rods

Owner's Manual

Congratulations on the purchase of your Fly Logic fly rod, which is proudly made in the USA. We're aware you had many options in the selection of a fly rod and are pleased you decided Fly Logic is your rod of choice. You can expect this rod to provide many years of dependable performance and enjoyment.

Recommended Cleaning Instructions

When fishing fresh or saltwater, handwash your Fly Logic rod carefully in a solution of mild soapy water. This will remove any residue or contamination. Gently rinse with freshwater after washing. Make sure to dry with a soft cloth and air dry to ensure the rod is completely free of moisture before returning to rod sock and tube.

Protecting The Finish

Your fly rod blank and guides can be polished by applying liquid furniture polish with a soft cloth. This will enhance the blank color and keep your rod looking great. Protect the reel seat by lightly applying a lubricant to the barrel, butt cap, and rings with a cotton swab. Avoid application of polish or lubricant to any cork component.

Ferrule To Ferrule

To keep your rod sections tight and secure, periodically use a light coat of paraffin (candle wax) on the male section of the ferrule. Gently coat this section of the rod with the wax. By using this procedure, you will minimize loose sections while fishing.

Storage

Always protect your Fly Logic rod by storing in a rod sock and tube or a rod/reel case. Damage can occur when loose sections are transported without this protection. Also, a case will protect your rod from harmful sun and weather hazards. Heat is one of your fly rod's greatest enemies, never subject your rod to direct sun when stored in a vehicle. The excessive heat can compromise the high-quality materials used in your Fly Logic rod blank.

Suggestions While On The Water

Never grasp your fly rod above the cork grip while fighting a fish. This technique applies too much stress to the upper section of the rod. Instead, fighting the fish side-to-side will disorient the fish and provide better leverage. ♡ If you snag your fly, point your rod tip toward the snag. With rod pointing toward the snag (without flexing the rod), you will successfully apply the most pressure to pull the dislodged fly away from the snag point. Never attempt to free a snag by flexing your rod tip. ♡ Finally, always use caution when lightning storms approach. Your fly rod is an excellent conductor of electricity. Never use your Fly Logic rod with an electrical storm in the area you are fishing. Seek cover as soon as possible and wait until the storm passes before resuming your fly fishing adventure.
